

Vladislav Bakin, Software Engineer

Perm, Russia • [Github](#) • [LinkedIn](#) • [Portfolio](#) • meidorislav@gmail.com • +7 995 862 7899

Education

Perm National Research Polytechnic University

Bachelor of Science in Informatics and Computer Science

Perm, Russia

2023 - 2027

Professional Retraining Program in Data Mining and Machine Learning (PNRPU)

Qualification: Data Mining and Machine Learning Implementation Specialist

Skills: Python, scikit-learn, PyTorch, pandas, NumPy, Matplotlib

Remote

2024 - 2025

Xsolla School – Software Engineering

Full-stack & backend track covering Go, TypeScript, React, Docker.

Participated in hackathons; studied product and business fundamentals alongside engineering practice

Perm, Russia

Feb. 2026 - May 2026

Experience

Software Engineer (University industrial placement)

LLC "Avangard" | LLC "Perm-Ocenka"

- Authored the Business Requirements Document (BRD): mapped AS-IS business processes via BPMN, defined 16 business requirements, risk matrix, and acceptance criteria
- Designed microservices architecture using the C4 model (Structurizr DSL) — 5 backend services, frontend with React SPA, event-driven via Kafka, auth via Keycloak (OAuth2/OIDC)
- Served as Technical Lead: coordinated task breakdown, code reviews, and delivery across a 2-engineer team

Stack: Go, PostgreSQL, Redis, Keycloak, Apache Kafka, Docker, Caddy, TypeScript, React, GitHub Actions, REST API, Git, Jira

Remote

Jun. 2026 - Present

SQL Developer (University industrial placement)

LLC "Information Service Center"

- Worked with MS SQL Server databases
- Investigated and resolved database-level issues using T-SQL queries and DbForge
- Performed data extraction and reporting from MS SQL Server databases
- Used DbForge and SQL Server Management Studio (SSMS) for database testing and query development

Stack: T-SQL, MS SQL Server, Git, SVN, Redmine

Perm, Russia

May 2026 - Jul. 2026

Projects

mem ([GitHub](#))

• **Description:** Local-first "second brain" for your terminal. Semantic search over commands, configs, and notes – powered by Ollama

• **Technologies Used:** Go, LanceDB, SQLite, Ollama, RAG

Jun. 2026 - Present

WhoAmongYou ([Live demo](#) • [GitHub](#))

• **Description:** Real-time multiplayer party game with WebSockets. Cozy vibes & interactive rounds

• **Technologies Used:** Go, Chi, WebSocket, TypeScript, React, Vite, il8next, PostgreSQL, Docker, Caddy, GitHub Actions

May 2026 - Present

Storefront & Sales (source code retained by organizers)

1 May 2026 - 8 May 2026

- **Description:** E-commerce platform with product management dashboard, recommendation engine, and filtered search
- **Role:** Team Lead, Backend, QA
- **Technologies Used:** Go, TypeScript, React, Vite, PostgreSQL, TypeSense, Redis, ML (Python Rec Sys), Docker, Nginx, Planka
- 1st Place on Xsolla School Hackathon

PurrCase ([Github](#))

5 Apr. 2026 - 8 Apr. 2026

- **Description:** Cat-themed loot case marketplace. Xsolla payments integration
- **Role:** Team Lead, Backend, QA
- **Technologies Used:** Go, TypeScript, React, Vite, PostgreSQL, Redux Toolkit, Docker, Nginx, Planka
- 2nd Place on Xsolla School Hackathon

Additional

Language Skills: English (B2), Russian (Native)

Relevant Technical Skills: Go, Python, SQL, PostgreSQL, Redis, Docker, Caddy, GitHub Actions, Git, Linux

Interests/Hobbies: Linux enthusiast – 3 years running Arch Linux as primary OS
